

**Tire process oil AT845**

This oil is one of the paraffinic oils and has a clear brown color, and like 840 oil, it is used in the production of elastic rubber products. It is used in rubber industry and the higher viscosity compared to 840 oil is the only difference between these two types of oil.

**Application**

Rubber products with high elasticity, such as tubes, soft rubber covers, rubber washers, rubber bands for household appliances, etc.

Product supply:

Barrel, bulk, flexi tank
